INSTRUCTIONS FOR USE C&B-METABOND® ADHESIVE CEMENT

**SEE BACK PAGES FOR
MSDS INFORMATION**
(All ingredients listed on MSDS sheets)

DEVICE DESCRIPTION:

An adhesive cement that bonds to tooth structure, metals, resins and (when used with Parkell's Etch-Free™ porcelain liner) unetched ceramic surfaces.

INTENDED USE/INDICATIONS:

Cementation of low-retention cast crowns, inlays, onlays, endodontic posts, and resin-bonded bridges ... emergency reattachment of fractured teeth ... repairs of porcelain popoffs ... adhesive pulp caps of small exposures.

CONTRAINDICATIONS:

Not for use on or by persons who have a methacrylate sensitivity.

PRECAUTIONS:

Caution: Do not use C&B-Metabond® on surfaces that have been contaminated with eugenol (ZOE, etc.) as it will inhibit setting.

Caution: Prior application of Pain-Free™, varnishes or liners (copal varnish, Ca(OH)₂ or glass ionomer) is not recommended, as it will reduce or prevent adhesion.

Caution: Do not mix the adhesive while it is warm. C&B-Metabond begins setting rapidly. To prevent premature setting, always mix in the chilled porcelain dish.

Caution: Prevent contamination of surfaces being bonded. Whenever possible, use a rubber dam.

INDIVIDUALIZATION OF TREATMENT:

C&B-Metabond creates extremely high bond strengths that make recovery of the restoration difficult. It should not be used for cementing any restoration where there is a likelihood that removal will be necessary.

CONFORMANCE TO STANDARDS:

Parkell's quality system is certified to ISO 9001/ISO 13485.
