## 6. Accidental release measures

### Personal precautions

Remove possible causes of ignition - do not smoke. Ensure sufficient supply of air. Avoid inhalation, and contact with eyes or skin. If applicable, caution - risk of slipping. For personal protection see section 8.

### Environmental precautions

If leakage occurs, dam up. Resolve leaks if this possible without risk. Prevent surface and ground-water infiltration, as well as ground penetration. Prevent from entering drainage system. If accidental entry into drainage system occurs, inform responsible authorities.

### Methods for cleaning up

Soak up with absorbent material (e.g. universal binding agent, sand, diatomaceous earth) and dispose of according to Section 13. Use no flammable substances. Fill the absorbed material into lockable containers. Keep moist. Do not let the solution dry up. Flush residue using copious water.

## 7. Handling and storage

### Handling

Avoid inhalation of the vapours. Ensure good ventilation. Keep away from sources of ignition - Do not smoke. Take measures against electrostatic charging, if appropriate. Avoid contact with eyes or skin. Eating, drinking, smoking, as well as food-storage, is prohibited in work-room. Observe directions on label and instructions for use. Use working methods according to operating instructions. For precautions see section 2.2.

### Storage

Keep out of access to unauthorised individuals. Not to be stored in gangways or stair wells. Store product closed and only in original packing. Do not store with flammable or self-igniting materials. Store in a well-ventilated place. Protect from direct sunlight and warming. Store at room temperature. Do not store over 30°C.

**Appropriate engineering controls:**

Ensure good ventilation. This can be achieved by local suction or general air extraction. If this is insufficient to maintain the concentration under the WEL or AGW values, suitable breathing protection should be worn. Applies only if maximum permissible exposure values are listed here.

**Individual protection measures, such as personal protective equipment:**

**Eye / face protection**

Tight fitting protective goggles (EN 166).

**Skin protection**

Solvent resistant protective gloves (EN 374). If applicable, safety gloves made of butyl (EN 374), protective Neoprene® / polychloroprene gloves (EN 374), protective nitrile gloves (EN 374), protective hand cream recommended. Protective working garments (e.g. safety shoes EN ISO 20345, long-sleeved protective working garments).

**Respiratory protection**

Normally not necessary. If OES or MEL is exceeded. Gas mask filter A (EN 14387), code colour

**General hygiene considerations**

brown. Observe wearing time limitations for respiratory protection equipment. Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Keep away from foodstuffs, beverages and feed. Immediately remove all soiled and contaminated clothing.
