4.0 First Aid Measures4.1 General Information **Embrace Varnish, applied to the patient's teeth in the recommended dosage, is a minimal health hazard.****NOTE:** Although the rosin is hydrogenated and highly refined, it may cause an allergic reaction in susceptible individuals.

Sodium fluoride overdose is not an issue with this product. In the entire pouch, there is 0.02 g of sodium fluoride. A typical application of varnish would deliver less than 0.01 g of sodium fluoride to an adult's dentition, less than 0.005 g to a child's, well below the level that would cause adverse symptoms.

Ingestion or absorption of large amounts of ethanol (much greater than the 0.08 ml in the unit dose pouch) may cause central nervous system effects.

Show this safety data sheet to medical personnel. Get medical attention in case of uncertainty.
