### Section 2: HAZARDS IDENTIFICATION

**Classification:** Not hazardous when used in accordance with the relevant identified uses. Above its melting point, wax becomes a liquid and flows more readily as its temperature increases. If material becomes a hot liquid, it requires special handling. At temperatures significantly above its melting point, hydrocarbon vapors are given off which should be handled with adequate ventilation. Can cause eye, skin and respiratory irritation when heated significantly above its melting point.**PBT/vPvB Assessment:** This product does not contain persistent, bioaccumulative and toxic chemicals (PBT's) nor does this product contain any very persistent and very bioaccumulative chemicals (vPvB's).

### Section 3: COMPOSITION / INFORMATION ON INGREDIENTS

Substance	CAS	Percent (w/w%)
No classified ingredients present	-	-

### Section 4: FIRST AID MEASURES

Material as supplied is non-hazardous; however, If exposed to melted wax consider the following first aid measures:

**Inhalation:** Move victim to fresh air. Call a physician if symptoms persist**Eyes:** Exposure to fumes vapor and smoke from thermal degradation can cause irritation. Direct contact with molten material will cause eye injury. Flush eyes with copious amounts of water for 15 minutes, administer first aid, and call a physician.**Skin:** Exposure to fumes vapor and smoke from thermal degradation can cause skin irritation. Exposure to molten material can cause burns. Run exposed area under water for 15 minutes, then contact a physician. Do not attempt to remove material bonded to skin.**Ingestion:** Ingestion of molten wax is not a likely source of exposure.

### Section 5: FIRE FIGHTING MEASURES

**Extinguishing Media:** Carbon dioxide, foam and dry chemicals.
