DO NOT ADD AMINES TO THIS PRODUCT.

Product contains sodium nitrite which can react with amines to form nitrosamines which are known to be animal carcinogens.

Absorption of sodium nitrite into the body may lead to the formation of methemoglobin which in sufficient concentration causes cyanosis. Since reversion of methemoglobin to hemoglobin occurs spontaneously after termination of exposure, moderate degrees of cyanosis need to be treated only by supportive measures such as bed rest and oxygen inhalation. Thorough cleansing of the entire contaminated area of the body including scalp and nails is of utmost importance.
